

Things You Should Know:

- Many of the animals will arrive with kennel cough (a dog cold), giardia (parasites that cause diarrhea, and rarely but it is possible that you could get a litter of puppies that has parvo (a virus that can be deadly to pups and can remain in your home for a year) If you receive a sick dog or pup we will give provide the medications and teach you how to treat them but we do not normally move dogs to new homes when these problems arise.
- Most animas are not a problem but some may cause damage to your house. Some dogs and pups are not house trained. We can give you ideas to solve the behavior problems you encounter. Unfortunately we cannot cover any damages done by the dogs even if you were being responsible in your care of them.
- Most animals are adopted in less than two weeks, but for some it takes a few months before they are adopted.
